

*Simply recall facts, processes, theories.
Remember information.*

- Name the 13 original colonies.
- Describe the story's setting.
- Define the scientific terms.
- Label the nervous system's features.
- Identify the statistical pattern.

KNOWLEDGE

Understand the material.

Get meaning from the symbols.

- Summarize the history.
- Explain the story's plot and theme.
- Interpret the experimental data.
- Generalize about good eye care.
- Translate into an algebraic equation.

COMPREHENSION

Use the material you learned and now understand in new, concrete situations.

- Compute population ratios.
- Use different sentence openings.
- Demonstrate effects of air pressure.
- Show proper warm-up exercises.
- Graph relative earnings.

APPLICATION

Break down the information into its component parts in order to understand its organization and structure.

- Diagram the sentence.
- Break down the flashlight.
- Analyze an emergency plan.
- Differentiate between governments.

ANALYSIS

Make reasoned judgments based on clearly defined and defensible criteria.

- Compare the Peace Corps to Vista.
- Critique the production of the play.
- Judge results & justify your decision.
- Appraise advantages & disadvantages.
- Decide which technique is best to use.

EVALUATION

Put parts together in a new, creative way to make a desirable and original whole.

- Propose an improved policy.
- Write and illustrate a picture book.
- Devise an experimental procedure.
- Compose songs to teach good habits.
- Formulate an algorithm.
