

“Now check all your work carefully.”

- Make sure you have all required commas and labels.
- Make sure all your labels are the correct ones.
- If you rounded, make sure you rounded to the correct place value. If the information given to you is rounded to a particular place value, round the answer to that value, too.
- If the information is given in decimals, answer in decimals; if it is given in fractions, answer in fractions.
- Make sure all fraction answers are in lowest terms.
- Show your work: how you set up, your steps, the answer.
