

The Five Themes of Geography

by Janet Kragen

2011

(to the tune of “Jack and Jill Went Up the Hill”)

The five themes of geography
include one called **location**.

It can be relative
or it can be absolute
(being exact with numbers).

The five themes of geography
include the idea of **movement**.

People move
from place to place.
So do their things and ideas.

The five themes of geography
include the **place** itself.

The human and physical
characteristics
describing what you’d find there.

The five themes of geography
include the idea of **regions**.

Official divisions
or casual boundaries,
each region has things in common.

Human-environment interaction

is our last theme of geography.

Humans adapt
to different environments,
but environments change people also.
